COMPLETE KEY CONTROL
IN ONE EASY SOLUTION

Cabinet

Secure Electronic Locking Cabinets:
Each set of keys are locked into individual slots within a locked cabinet that only releases keys to authorized employees.

Illuminated Locking Key Slots:
Key slots illuminate after a user selects a key from their authorized list, making key rings easy to find.

Multiple Authentication Options:
Your choice of PIN code, card access, fingerprint reader or card and PIN.

Key

Touchless RFID Keytag Identification:
Contactless identification makes returns faster, eliminates user error and provides an audit trail of returns.

Maintenance Free:
The RFID keytag requires no cleaning or maintenance, is corrosion resistant, waterproof and comes with a LIFETIME warranty.

Secure Key Rings:
Keytag with security seal and tamper-proof key ring prevents unauthorized key removal. Replace security seal an unlimited number of times without replacement of keytag.

Custom Software Implementation

Customization:
Key Tracer can build custom applications to fit specific customer needs and requirements.

REAL TIME Transaction Logging:
Every transaction is automatically recorded producing accurate usage logs, including all changes to access and permission levels. Multiple Key Tracer systems communicate simultaneously.

Enterprise Level SQL Database:
Multiple systems can be connected to a single secure SQL database across LAN/WAN.

Browser Based Administration:
Web based user interface allows administrators access to reports and functions from any web browser on the network.

Emergency Key Releases:
From any web browser on the network.

Custom Reports:
Query any user, key ring, alarm or transaction for any date range then export reports to any format.

Automatic Alarm Notifications:
Automatic email alerts can be created and sent to your computer or smartphone as they occur:

- overdue sensitive keys (key curfew)
- key override
- wrong password entry
- and more

KeyTracer
A division of Real Time Networks

Key Tracer is a complete and customizable asset management solution ideal for organizations who need to control access to buildings, vehicles, valuables and more.

- **Eliminate time-consuming key transaction record keeping**
- **Stop unauthorized access to keys**
- **Prevent lost or misplaced keys**

Key Tracer is a Contactless Key Management System

Exclusive RFID technology sends a signal between the tamper proof keytag and the secured key cabinet controlling key access. Key Tracer is the only RFID key management system available.

Individuals or groups can only access the keys you have authorized while all other keys remain locked in place. A full range of reports give you a complete audit trail based on whatever information you require.

Key Tracer Includes:

- Extensive customer support 24/7/365
- Easy-to-use web-based software
- Tamper-proof, lifetime warrantied keytags
- secure key cabinets and keytag locking slots
- Real-time audit records of key transactions
- Full battery back-up system
- Alarm relay connections and email notifications

RFID Technology:

- Maintenance-free technology
- Save time and money with no keytag replacement or repair costs
- Real-time key transaction recording
- Eliminate lost or misplaced keys resulting in expensive lost man hours and unnecessary added stress

Key Tracer Cabinets:

- 5 alarm relays for strobe light or siren connection and CCTV access and control
- 18 gauge steel cabinets
- Automatic locking/unlocking door
- Cabinets can be daisy-chained' to create single-controlled system
- Up to 5 sizes available

Key Tracer Slot Panels:

- Custom, modular, mix'n'match design
- 8, 16 or 32 key panels
- Each individual keytag is locked into position
